Fairport acquires Aeromaster International Ltd

The Fairport Engineering Group has acquired the assets and business of Aeromaster International Ltd. Aeromaster will form a key part in the Fairport Engineering Group of companies and will continue to trade as normal under its own name.

Fairport is a long established brand name in all aspects of minerals and materials handling, process plant and equipment. Aeromaster International adds a wealth of know-how, technology and proven experience in Aero-mechanical conveying of powders and granules.

Aeromaster International is a good strategic fit with Fairport's Process Materials Handling Division based in Stockport, Cheshire. The company will be integrated alongside Flomat Bagfilla International, Fairport NEU Solutions and Fairport Process Equipment.

Fairport Engineering Group Managing Director, Paul Fitton, says "The integration of Aeromaster International will enable our Group to provide our clients with an even more comprehensive range of bespoke materials handling equipment and process systems. We are 100 per cent committed to the integration and taking the business forward."

The Fairport Engineering Group will be exhibiting at the easyFairs Exhibition at the Reebok Stadium, Bolton on the 14th and 15th June on stand 240. **+44 (0) 161 4774775. Please quote BST.**
